Career Objective
I'm an aspiring Front-End Developer with practical experience in HTML, CSS, Tailwind CSS, JavaScript, React.js, and Next.js. I enjoy building clean, responsive, and user-friendly websites, and I'm eager to apply my skills to real-world projects. I'm also excited to keep learning and growing by working with supportive, collaborative teams.

Projects
E-Commerce Web Application
Description: Developed a modern, responsive, and user-friendly e-commerce web application where users can explore products, view detailed product information, and manage their shopping cart seamlessly. Implemented smooth navigation, state management, and interactive UI components to ensure a real shopping experience.

Key Features:
- Dynamic product listing & detail pages (React Router)
- Cart: Add, Update, Remove items
- Real-time cart state with **Redux**
- Responsive UI design with Tailwind CSS (mobile-first app roach)

Technologies Used: React.js, Redux, React Router, Tailwind CSS, Slick Carousel, Git, GitHub

To-Do web Application
Description: Developed a full-stack task management system with secure user authentication and authorization. Users can register, log in, and manage their personal to-do list with CRUD operations. Implemented JWT-based authentication to protect routes and ensure data privacy

Key Features:
- User registration & login with JWT authentication
- Profile update functionality
- Add, update, delete, and mark tasks as completed
- Secure protected routes for user-specific data
- Responsive UI with React and Tailwind CSS
- RESTful API with Node.js, Express.js, and MongoDB

Technologies Used: React.js, RTK Query, React Router, Local Storage.
